### DETAILED ACTION

1. Claims 26-108 are presented for examination.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The claimed invention in the instant application is fully disclosed in the patent and it is broader than the claimed invention in the U.S. Patent numbers 6,483,912 and

6,748,070. No new invention, or new improvement is being claimed in the instant application. Applicant is now attempting to claim broadly that which had been previously described in more detail in the claims of the patent (In re Van Ornum, 214 USPQ 761 CCPA 1982).

Furthermore, there is no apparent reason why Applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent.

Claims 26-108 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-39 of U. S. Patent No. 6,483,912 and claims 1-40 of U.S. Patent No. 6,748,070 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent. Although the conflicting claims are not identical, they are not patentably distinct from each other because the context of the claimed invention is similar to the context of the cited claim of the U.S. patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: method and system for allocating network resources.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Richards et al (US Pat No. 3,909,544) disclose a junctor allotter.

Demuynck (US Pat No. 5,363,435) discloses a system and method for seizing a trunk circuit.

Anderson et al (US Pat No. 5,809,129) disclose a resource separation in a call and connection separated network.

Anderson et al (US Pat No. 5,936,951) disclose a method of dynamic resource allocation.

Cairo (US Pat No. 5,956,154) discloses a trunk reserved for a certified call.
